Systemic report "Problems with administering business taxes in Ukraine"	<p>To ensure stability of respective laws and regulations, once the deficiencies in the VAT electronic administration functioning are eliminated, so that they will remain unchanged (or significantly unchanged) for a significant time. 	<p>The State Budget of Ukraine shall reflect consolidated VAT amount (i.e., the difference between the income from VAT and expenses for VAT refund). For this purpose the Budget Code of Ukraine shall be respectively amended. In our view, if implemented, such an approach would allow overthrowing traditional argumentation of the tax authorities that VAT refund is effectively limited by the limits foreseen in the State Budget.</p> <p>Ministry of Finance</p>	<p>Implemented — comments: In the state budget, starting from 2016, planned VAT receipts from goods (works, services) produced in Ukraine are reflected as a balance between tax collection and reimbursement. The same principle is envisaged in the approved budget for 2019.</p>
